Kansas City, Mo.,
to all parts of the United States,
Canada and Foreign Countries.

PARCEL POST PAID BY US

Do You Remember

that for fifteen years we kept this up, from the time parcel post came into existence until 1925 when costs climbed so that we explained in our 1925 catalog we were compelled to ask the customer to absorb the cost of transportation rather than advance prices. But, we promised that as soon as conditions warranted, we would go back to our old policy. Not only have we done this, but on many items where we found it possible we have made reductions in price. Needless to say, the news will be welcome when our customers again learn

WE PAY

Transportation Charges

These terms apply on shipments to any part of the United States and Canada, and means that we absorb and pay all transportation charges, be it parcel post, express or freight on all goods shown in our catalog, except such few items as may be priced F. O. B. Kansas City. On shipments to Panama Canal, Cuba, Hawaii, Mexico, Porto Rico and other foreign countries our terms are F. O. B. Kansas City on entire line.

Goldblatt Terrazzo Workers' and Concrete Block Makers' Trowels—English Pattern

15 inches long—4 $\frac{3}{4}$ inches wide at heel—Tapers to a point.

Terrazzo Workers, also Concrete Block Makers do a great deal of slushing and spreading also very often tamp their work, and in using an ordinary Plasterer's Trowel, they frequently bend the handle down on account of leaning down so hard on their trowel. We have therefore originated these Double Post Trowels for that class of workmen. The blade and mounting on these Trowels are very heavy, so that they will stand much hard use. No. 23—Price, each.....\$3.95

Auto Spring Steel Bricklayers' Trowels

We are introducing our special line of Trowels, made from Automobile Spring Steel. In this special auto spring steel line of Trowels we have developed a superior quality which surpasses anything on the market. The expert Bricklayer has always wanted a Trowel that will not kink or warp in any fashion whatsoever, and now you can have it. Many a time you have said you would pay \$10.00 if you could get a Trowel that will hold up under all conditions. The time is now here, but, you don't have to pay \$10.00. No, you can obtain just such a Trowel at the low prices shown below.

Just think of being able to buy a trowel made of auto spring steel, the toughest material of which a trowel can possibly be made of, at only \$2.95. When ordering just specify our Auto Spring Brick Trowel and give style number, also state size.

Goldblatt Melvin Pattern Plasterers' Brushes With Long Handle

We developed this Brush for those Plasterers who desire to get away from the Leather Bound Brushes, and at the same time have a Brush that is not any heavier than the regular Leather Bound ones. The sale on this Brush has been so large that we have hardly been able to produce them fast enough.

The general construction of this Brush is very similar to the heavier Kansas City style Brush shown on opposite page, only that this one is of three-row construction instead of five rows.

Like our guarantee on all 'Trowel Brand' Tools, you have our assurance that if Brush is not perfectly satisfactory your money will be refunded.

Made of Pure Gray Russian Bristles, comes in two sizes.

Plasterers' Aluminum Hawks

Our Aluminum Hawks are made of very hard cold rolled aluminum 3-32 inches thick. They are lighter in weight than Wood Hawks. The handles are detachable with a 4-inch flange with a hub extending $\frac{1}{8}$ of an inch to receive thread on handle. This flange makes the Hawk very strong and durable.

All Aluminum Hawks are not alike. Buy a Goldblatt "Trowel Brand" Aluminum Hawk and you will see a big difference.

A sponge rubber callous preventer furnished free with each Hawk.

Plasterers' Wood and Aluminum Darbies

Made of selected soft white pine of vertical grain 48 inches long, $3\frac{5}{8}$ inches wide, $\frac{1}{2}$ inch thick. Round handle 4 inches long, rib 18 inches long.

No. 5—Price, each.....\$1.20

Our Aluminum Darby, light, strong and more flexible than Wood Darbies; 44 inches long; $3\frac{1}{2}$ inches wide $\frac{1}{8}$ inch thick. The 4-inch round handle is detachable. Rib is 18 inches long. It's a fine tool for fine work.

No. 7.....\$3.00

Made of the finest mahogany obtainable. If you want a real fine Darby buy one of these Mahogany Darbies—same size as the White Pine. It's a Dream.

No. 6—Price, each.....\$2.25

Unlike all other Wood Darbies on the market which are made of $\frac{1}{2}$ " material and always warping and kinking—We make ours out of 1" material. We do not saw the 1" material in two thicknesses. We work the 1" material down to the $\frac{1}{2}$ " thickness. We then select every board and treat every

Darby Board like you would treat a baby. We waste a lot of material in making our Darbies in this way, but we believe in making them right. That is why our Wood Darbies, especially our Mahogany Darbies are still in use after dozens of the cheap ones have warped, kinked and you only know what else. Don't buy a Darby from inexperienced people because it's cheap.

Goldblatt Giraffe-Neck Aluminum Plasterers' Paddle

This is one of the keenest tools that we have brought out in the last few years. Just lay your hands on this tool and you would not let it go for a ten dollar bill. It's very light, weighs only five ounces. The blade is $1\frac{3}{4}$ " x $2\frac{3}{4}$ ". The full length of tool is $12\frac{1}{2}$ ". Can easily be carried in a vest pocket or in overall leg pocket. The end of handle comes to a chisel point. Nothing can take the place of this tool to work in back and around pipes and congested corners. But, in addition to these uses, this tool will be found as worth its

weight in gold when doing all sorts of ornamental plastering, modeling, etc. This tool will also be found very useful to cement finishers.

Don't Pass This By. It's a wonderful Tool and you can't afford to be without one.

When ordering just specify *Goldblatt Giraffe-Neck Paddle*.

Caen Stone Joint Cutter or Saw

In the sawing or cutting of joints in Caen Stone Walls, those plasterers who have done this class of work successfully will agree with us that it requires a carefully made tool. This is just such a tool and has been made from plans supplied by men who are most expert in Caen Stone Work. A tool not correctly made, no matter how cheap you buy it for, will be very expensive as it may ruin the entire job.

Tile Marker Deluxe Patented

Side View.

Full Size Side View of
our Patented Swedish
Razor Steel Blade as
Used in DeLuxe Tile
Marker.

You have always wanted a Tile Marker like this. You have dreamed of a Tool that could be pulled along the line of a straight edge without that fear of cutting too deep in one line and too shallow on the next line. You have dreamed of a Tool with which you could do an extra fine job of marking imitation tile in Bathrooms and Kitchens without that fear of cutting ugly uneven grooves and utterly ruining the looks of the job. You have often thought that if you could just get your hands on a Tool like this that you would welcome every job of this kind that was offered you and that you would then be able to please your clients in every Tile Marking Job. That uncertainty is what always worried you. That same uncertainty can now be banished from your mind forever.

Our patented DeLuxe Tile Marker, which is shown above, overcomes all obstacles formerly encountered in this work. It is so devised that even an apprentice can use the tool and accomplish a perfect job of Tile Marking. It is impossible to cut wrong, too deep or too shallow. Simply pencil mark the lines, this can be done with the aid of a compass and a straight edge. Squares can be laid out in the following most popular sizes—4x4 inch, 6x3 inch, or 6x6 inch. This little wonderful tool with its keen Swedish Razor Steel Blade will do the rest.

Made of Aluminum. Weighs only $3\frac{1}{2}$ ounces, $6\frac{1}{2}$ inches long. Can be carried in Vest Pocket like a Fountain Pen.

It's worth a \$10.00 bill, but produced so that every Plasterer can afford it at only.....\$1.25

Extra blades 15c each or 2 for a quarter.

Be an Expert *TILE MARKER!*

Earn Big Money

*The Little Tool
that Makes
It Easy!*

In the above picture you will see just how our Patented DeLuxe Tile Marker is applied to actual work of cutting the small joints on hard surface plastered walls. Notice the convenient shape of the tool. Notice that it is just as easy to cut into the corners and angles as it is to cut along the middle of wall. Notice how the plaster comes through that keen sharp blade in a steady, uniform stream, like a liquid comes through the small end of a funnel. Never out of order, you can always depend on it.

Blades are self sharpening and will last a long time before worn out. New blades can be inserted in one minute.

With each Deluxe Tile Marker we include two blades, one to cut half round joint and one to cut "V" joint. See illustrations below.

Infringements in design, construction of body or blade will be prosecuted to the full extent of the law.

These tools are delivered to your door at these prices

Goldblatt Tool Co. Kansas City, Mo.

Caen Stone Marker DeLuxe Patented

Like our DeLuxe Tile Marker, this tool has proven to be the most successful for marking of Caen stone joints. This tool is especially desirable when marking off before Caen stone is set, or about when it's set half hard. For marking hard set Caen stone, what is known as French Caen stone, we recommend our No. 800 on page 43.

Everything said about our DeLuxe Tile Marker on preceding page also holds true of this DeLuxe Caen Stone Marker. The principle is the same, made the same and works the same.

Please note the square cutting blade which makes a perfect square depression in imitation of Caen stone blocks. Also note the two cutting lips on blade, which first cuts the width and depth of the material to be taken out and the cutter of the blade scoops the material out, leaving a perfect joint.

This tool is also used in marking off joints on certain types of Travertine plastered walls.

It is indeed worth its weight in gold and price is only\$1.40

Goldblatt "Trowel Brand" Plasterers' Pants-Back View.
White Drill Material

Our Special Plasterers' Pants illustrated here need no introduction.

To those who have never used them we desire to say these Pants are not just overalls. They are cut and tailored like good dress trousers and they fit like real trousers, you will find real comfort when working in these pants.

They are made purposely for those plasterers who do not like Bib Overalls, and who prefer to use a belt instead of suspenders. They have two large hip or back pockets, two smaller ones on the side of legs for pointing trowel and other small tools, and a watch pocket at waist line. The two hip pockets and watch pocket have flaps which prevent plaster and mud from falling in them. They are made of best quality white high count drill and are strongly made. All sizes up to 42 waist.

No 20—Price per pair \$1.60

For Sizes from 44 waist up to 48, add 25 cents per pair to above prices.

When ordering Pants, do not fail to state sizes wanted. Give waist and length measurement. Page 51

Goldblatt "Trowel Brand" Plasterers' Work Shirt

BACK

This shirt was designed especially for Plasterers. You all know the disadvantage in the ordinary undershirts, which are so skimpy and their short sleeves getting shorter every time they are put on. You know, too, how difficult it is getting them on and off.

It's different with this special Plasterers' Shirt. It's made extra roomy and large and the sleeves are extra long. Easy to get on and off, also notice the neck, which fits close around you to keep the plaster and lime from burning you, with one real good button on the back. The long sleeves keep your wrists and arms protected.

Made of superior quality cream color Balbriggan of a weight desirable in summer or winter. Made in sizes 38, 40, 42, 44 and 46.

When ordering state size wanted.

Diamond V Head Jointer

Lay your hands on this keen, well balanced jointer and you will wonder why you have not had one long before. It really is the best style and shape brought out in a long time. Especially is this jointer convenient for striking head joints. This jointer makes an excellent combination with the V Sled Runner shown below. Comes in $\frac{3}{4}$ " size only.

No. 490—Price, each.....75c

Sled Runner V Jointer

When good looking uniform V joints are desired it is useless to attempt accomplishing such work without the use of a Goldblatt Sled Runner. Every good brick-layer needs only to study above illustration then picture in his mind the results that can be obtained. Length overall is 18". Width of sides 1".

No. 4800—Price, each.....\$1.50

Sled Runner O Jointer

The same can be said of this Round Sled Runner Jointer as is said of the V style above. Length overall is 18". Diameter of round $\frac{3}{8}$ " or $\frac{1}{2}$ ". When ordering state whether $\frac{3}{8}$ " or $\frac{1}{2}$ " is wanted.

No. 4700—Price, each.....\$1.50

Tuck Pointers Flat Joint Filler

This is just the tool for filling up old joints or when tuck pointing new work. The blade is $5\frac{1}{2}$ inches long and almost $\frac{1}{8}$ -inch thick. Comes in $\frac{3}{8}$ ", $\frac{1}{2}$ ", $\frac{5}{8}$ " and $\frac{3}{4}$ " widths. State width desired. This tool is balanced perfect and in demand by all expert Tuck Pointers.

No. 050B—Price, each.....75c

Window Caulkers Flat Joint Filler

The blade of this tool is about as flexible as a Pointing Trowel and is preferred by Window Caulkers. The blade is 5 inches long and comes in $\frac{3}{8}$ ", $\frac{1}{2}$ " and $\frac{5}{8}$ " widths. State width desired.

No. 051B—Price, each.....75c

Bricklayers' Gypsum Block or Macolite Saw

Designed and made especially for sawing Gypsum Building Blocks or any similar material. Coarse teeth blade 26 inches long. You will wonder how you ever got along without one of these convenient saws.

Aluminum Line and Surface Level Combined

Easily attached to line—Spring Clips prevent the level from falling off the line—accuracy guaranteed. Weighs only $\frac{5}{8}$ of an ounce—because of its shape this line level can also be used as a surface level—otherwise this Tool is similar to the line level shown on opposite page—after you own one you will say it's worth a five spot.

No. 15—Price, each.....90c

Cross Test Level

As the cut shows, two levels in one frame, extending at right angles $2\frac{3}{4}$ inches each way. The level weighs but 4 ounces. When placed on work to be leveled in both directions, it will not be necessary to move the tool. It is japanned; with nickel-plated ends.

No. 136—Price, each.....95c

Marking Chalk in Cones

In either blue or red color. Price per dozen 35c, or three pieces for 10c.

Tuck Pointers' Aluminum Hawks

This small size Hawk is admirably adapted for use by Tuck Pointers because of the inconvenience of larger Hawks on swinging scaffolds.

No. 11—8x8 inches.

Goldblatt "Perfect" Bricklayers' Joint Raker
Patented

As Necessary as a Trowel. **ONLY 35c**

We also call this our "Trowel Mate" Joint Raker because it's as necessary as a Trowel.

This is indeed a universal tool, and is becoming more popular all the time. We have sold thousands of them to satisfied users and can recommend them very highly to all our friends. It has two cutting heads, a long one for raking plain head and bed joints and a short one for raking head and bed joints in angles, at corners or where projections are made in the brickwork. All joints between $\frac{1}{4}$ inch and $\frac{3}{4}$ inch can be reached by this tool. No joint can be made that cannot be properly raked by this tool in a quick and neat manner.

In operation the tool is placed with the convex side against the face of the wall so that the right angled cutting head enters the joint, then by drawing the tool along the joint the cutting head plows the mortar out and throws it clear of the wall, leaving a neat square joint and a perfectly clean wall.

No. 5—Price, each 35c
Or 3 for \$1.00

Bricklayers' Dust Brush

This brush is used for brushing joints after they have been struck up with jointer. It is made of mixed Tampico. The whole Brush is 14 inches long. Brush part is 8 inches long.

Bricklayers' Combination Joint Raker

This Raker, Jointer and Striker combined makes a smooth, perfect raked out joint. There are no screws or nuts to work loose. The revolving wheel prevents wear and will not mar the work or cause irregular depths in joints as where other rakers are used. The wheel revolving against the brick makes it easier for the mechanic to handle the tool.

The handle of the Raker forms two Strikers which will clean out any mortar that may collect.

To adjust the Raker swing lever to the side and move the wheel back or forward to the depth desired, then swing the lever back in place and the wheel is positively locked in place. This Raker is made of a special grade of steel, thoroughly tempered, making it a first-class tool in every respect. Highly recommended by leading architects and mechanics.

Length 8 in., weight 6 oz., for $\frac{1}{4}$ to $\frac{1}{2}$ -inch joints.

No. 1—Price, each 65c

Mercury Plumb Bobs No. 87

The improvement consists in our patented device for fastening the string without a knot to tie or untie, simply by drawing it into the peculiarly slotted neck at the top, after unwinding the required length, when the bob will hang perfectly true.

These plumb bobs are made from solid steel, bored and filled with mercury. Noteworthy features are their great weight in proportion to size, low center of gravity, small diameter, hardened and ground points, knurling on the body and the simple and effective device at top for fastening end of line after winding up. Nickel plated. Each is provided with a braided silk line.

GOLDBLATT
CERTIFIED LEVELS

These tools are delivered to your door at these prices

Aluminum Line Level

The "Goldblatt Line Level" consists of an accurate, proved level glass placed in a three-inch aluminum tube with "spring silver" end pieces and hooks formed from one piece of metal. The end pieces are attached to the tube by silver rivets that pass through the tube and through lugs at top and bottom between the hooks and the center of the level, thus preventing the hooks from pulling out of alignment in case of severe strain or rough usage.

Every level is carefully tested and proved and is guaranteed to be accurate.

Every plasterer, bricklayer or cement worker should have one of these little tools in his outfit. They weigh only one-half ounce and take up about the same space as a fountain pen if carried in the pocket. The uses to which they can be put are almost as many as those of the old style wood level. They take the place of a straight edge and level and do the work more accurately.

No. 14—Price, each.....50c

Mechanics' Line Blocks

Once tried, always used.

An absolutely new, efficient and indispensable article, most essential to Bricklayers, Stone Masons, Carpenters, Structural Iron Workers, Concrete Workers, Draftsmen, Painters and Crafts, using lines for Snapping, Chalking and Measuring purposes.

Directions:

Hold line block with Cam on top, insert line from bottom up, through square hole then back under Cam, turn Cam down tight. Thread the second block the reverse of the above so the lugs on plate will be on the extreme opposite ends, if the line cannot be placed exactly where desired a further adjustment may be had by moving line up or down in slot or under cam.

Eventually the line block will be an important accessory to your Kit. Try them. Price 75 cents a set.

GOLDBLATT GREEN LINE Hard Vulcanized Fibre Plasterers' Tool Case

Because of popular demand we have brought out this wonderful Tool Case, which opens on the bottom instead of the side opening shown on page 81 of this catalog. The other differences between the one mentioned and this new one are as follows:

Size:	{	Long, 24 inches
		High, 16½ inches
		Thick, 7 inches

Lock: Is the finest made for use on cases of this type.

Bottom: Has four heavy bolsters which keeps the tool case off the floor.

Top: On the inside of case, riveted to underneath side of top, is a thin strip of poplar to stiffen.

Plasterers everywhere are buying this Tool case because of its lightness and firmness, and because it's ample in size. To say the least, it's the most durable and best value your money can buy.

Will Fit Wood or Aluminum Levels

Made of best quality brown color canvas.

No. 1—For 18 in. Levels. Price, each.....\$0.70

The vials of all our aluminum Levels are set the same way as in our wood Levels, covered by plate glass on both sides protecting them and making these important parts dust, dirt and waterproof. The great advantage in our wood and aluminum Plumb Rules over all others is that they are of double construction. No matter how they are picked up they are always in position for use, while the duplicate plumb glasses, one at the top and the other just below the center, both reading the same way, add to its convenience. For low work, upper plumb glass is read, and for overhead work the low glass is in range. Our complete line comprises the most popular Levels made.

Tile-Setters' and Marble Workers' Tools

Double Power Ceramic Tile Cut-Nippers

The opening in the frame is large enough to allow the jaws to be adjusted for wide opening as shown in cut, thus letting them to be used in cutting tile, for which purpose they are highly recommended by many tile workers who are now using them. The jaws can be easily replaced when necessary.

Cementers' or Pavement Workers' Knee Pads

**You Cannot Afford to Be Without Them
at Only \$2.75 a Pair**

They prevent rheumatism, pneumonia, stiff neck and lumbago. They relieve the backache which usually comes with kneeling, because the pressure on the knee cap is almost entirely eliminated by the use of these Pads.

The above reasons are the most important ones in favor of our Knee Pads. You should use them, too, because they will prevent torn and ragged working garments, and they will make you more comfortable when kneeling.

They are made of best quality harness leather and lined with a durable soft felt. Shaped and made to please you. They will surprise you for quality and workmanship, and the price is only, per pair.....\$2.75

TRACK TROWEL

This is a special Wood Trowel used in forming flange-ways along street car tracks and at railroad crossings.

Concrete workers and road paving contractors are familiar with those jobs in which a groove must be finished or molded on the inside of street car or railway tracks, in order to provide clearance for the flanges on the car wheels.

We quote on this tool only upon inquiry. When inquiring for price state quantity wanted and give dimensions in length and width of trowel wanted and state depth and width of flangeway.

It Makes No Difference

what kind of a trowel you want, you can find the right kind somewhere in this catalog.

These tools are delivered to your door at these prices

Cementers' Wood Floats

The Handle on this Float is designed with just such proportions as to make it the most comfortable. It never cramps the hand and is approved by all expert cement finishers. The sizes below have proven out to be most practical. The way these floats balance in the hand is perfect.

No.	14A	14B	14C
Size	3½x12	3½x15	3½x18
Price, each	65c	70c	75c

Cementers' Wood Float Handles

Because of the peculiar way in which the cement finisher holds his float while in use, we designed this handle for their particular use and do not recommend same for any other trade. If handles are wanted for plasterers' floats see pages 28 and 29.

This handle is same as used on our expert cement finishers' floats shown above. Years of practical experience is largely responsible for the perfecting of this handle.

Reversed Brass Letters and Figures for Imprinting

Figure

For imprinting name of streets in cement sidewalks or curbing at street intersections. These letters are cut very sharp and deep, thus insuring a good, clear impression. The lower edge of each letter is square, forming a guide to print absolutely straight. They are very easily spaced. Each letter and figure has a short handle.

Letter

Put up in a neat box as shown below containing 27 letters also 1 period, 1 comma, 1 dash and 1 straight edge.

Prices as follows:

Size 1½-in. letters, complete set.....	\$13.50
Size 2 -in. letters, complete set.....	16.50

BRONZE TABLETS

To produce a Bronze Plate or Tablet which is at once a work of art and a thing of lasting beauty is a task which demands better than average workmanship in pattern making, moulding, metal casting and finishing. To secure perfect reproduction from patterns, and to prevent variation in color, it is necessary that a special metal, which must be absolutely free from impurities, be used.

Hence, it is at once apparent that perfect results are assured only when the production of such plates and tablets is left to none but a firm that is thoroughly experienced in, and especially equipped for, the handling of this particular line of work.

Our Plant has every facility for the proper handling of Bronze Plate and Tablet work. The personnel is made up of master craftsmen who are highly skilled in executing such commissions.

Our Plates and Tablets are cast from a special bronze alloy which insures perfect reproduction from patterns, freedom from impurities, and uniform color. Faces of all lettering, borders, etc., are hand finished to prevent rounded surfaces and to give a high, dignified appearance.

As a result of the skill and painstaking care exercised in each operation, our Plates and Tablets, regardless of design and size, are truly

This Is a Real Sensation—50 Foot Steel Tape

\$1⁹⁵—

If it was made of tin it would be worth this price. But it is made of steel—an honest to goodness genuine 50 foot Steel Tape—as good as many \$4.00 and \$5.00 ones.

If you don't buy one, you are the loser. This is enough said.

Credit checks of any kind will not be accepted in full or part payment of the above Steel Tape.

Why Buy

a Level that you would be doubtful about?

Many of them you probably know are doubtful. You won't be in doubt if you buy

**CERTIFIED
LEVELS**

The Oldest and Largest Exclusive Business of Its Kind

Adjustable Leveling Stands

A practical device, light, compact and at low cost, for holding level with sights attached. It enables the user to run grades for ditches, drains, etc., and to set profiles for foundation work very quickly without incurring the expense of surveyor's instruments. It consists of two parts, a base and a rotating level carrier. The base can be attached by set screws either to one stake or crow bar or to three stakes forming a quickly improvised tripod, or can be set on a permanent object, as a box or stone. The level carrier is then accurately leveled and locked to this base. Made for use in connection with either wood or iron levels.

No. 38—4½" long by 5½" wide—(For holding metal levels)—

Price, each\$2.95

No. 48—4½" long by 3½" wide—(For holding wood levels)—

Corner Brackets For Carpenters and Stuccoers

Are as Necessary as the Regular Brackets. They Reach Out Under the Cornice Where They Are Needed.

These corner brackets make for absolute Scaffold Safety—the men do not have to jump around the corner in going from one side of the house to the other.

Fill that gap around the corner and do the work of two brackets. The men do more and better work. They make for safety and are just the trick for wide cornices.

Carpenter corner brackets attach to the corner post by two clamp bolts.

DRYCO

WATERPROOFING

DRYCO Series No. 100—Colorless

	1 Gal.	5 Gals.	$\frac{1}{2}$ Bbl.
Price.....	\$3.25	\$3.15	\$3.15

A colorless waterproofing which penetrates masonry from an eighth to one-half inch and absolutely waterproofs. Adaptable for stucco, concrete, brick, stone, paper, and also composition roofs. It prevents discoloration and disintegration.

Gasoline is the common carrier of this product and one gallon makes three. Covers from 700 to 1500 sq. ft., owing to porosity of surface.

DRYCO Series No. 200—All Colors

	1 Gal.	5 Gals.	$\frac{1}{2}$ Bbl.
Price.....	\$3.60	\$3.55	\$3.55

To be used for waterproofing, preserving and coloring stucco, concrete, brick or stone surfaces, and it is adaptable for either inside or outside work. The waterproofing seals in the oils and pigments, which makes them impervious to moisture and much more durable than ordinary lead and oil paints.

DRYCO Series No. 400—All Colors

	1 Gal.	5 Gals.	$\frac{1}{2}$ Bbl.
Price.....	\$3.60	\$3.55	\$3.55

We recommend this product for waterproofing, preserving and coloring wood and metal surfaces. The superiority of this product over ordinary paints lies in the inclusion of the water-acid and alkali proof ingredients which coat all other particles in the mix, making them moisture proof and not susceptible to the elements.

DRYCO Series No. 600—All Colors

	1 Gal.	5 Gals.	$\frac{1}{2}$ Bbl.
Price.....	\$1.85	\$1.80	\$1.75

The best shingle stain on the market. It not only waterproofs, but preserves the shingles and will double the life of same. The green and red colors will hold fast as long as the shingles last.

Dryco Waterproofing

(CONTINUED)

A Successful and Durable **WATERPROOFING** *For All Kinds of Structures*

DRYCO Series No. 700—Colorless

	1 Gal.	5 Gals.	$\frac{1}{2}$ Bbl.
Price.....	\$1.05	\$1.00	\$0.95

For waterproofing concrete, mortar, stucco and plaster in the mass. If used as an integral mixture will make the plaster coat absolutely impervious to moisture. Wet basements, swimming pools, silos, cisterns or any earthen surface can be treated with a plaster coat and made waterproof.

DRYCO Series—No. 800—All Colors

	1 Gal.	5 Gals.	$\frac{1}{2}$ Bbl.
Price.....	\$3.10	\$3.05	\$3.00

A very durable barn paint which contains the waterproofing qualities and is water-acid and alkali proof. Will easily last five years and prevent decay. It can also be used on either wood or metal roofs. Red, white and gray.

DRYCO Series No. 900—All Colors

	1 Gal.	5 Gals.	$\frac{1}{2}$ Bbl.
Price.....	\$3.60	\$3.55	\$3.50

A waterproofed floor paint for either concrete or wood. It carries a high polish and it is very durable, the surface is very hard and it is almost impossible to notice any indentations whatever from usage. Comes in any color.

DRYCO Series No. 950

	1 Gal.	5 Gals.	$\frac{1}{2}$ Bbl.
Price.....	\$0.85	\$0.80	\$0.75

DRYCO Asbestos Roof Coating. Is applied with roof brush or spreader. It will stop leaks, prolong life of roof, is practically indestructible, can be applied summer or winter, will not run under extreme heat of sun or get hard or brittle. Will remain elastic for years and expand and contract with the roof. Effective on metal, felt, paper, gravel or concrete roofs.

Good Stucco Work Is A Matter of Pride With Good Plasterers

Good plasterers know that they can make more money by doing good stucco work.

They know that this rapidly developing trend in artistic exteriors gives them a bigger and broader opportunity to keep busy.

It is also a matter of personal pride with them.

They want to turn out a fine job every time because they feel that they are being placed upon their honor.

Goldblatt Tools not only safe-guards the skill of good plasterers, but widens their reputation.

Goldblatt Tools are always dependable, they also offer a wider range of possibilities than any other tools.

While the complete process of applying stucco has been standardized by simple, time-tested specifications which you can easily follow, yet good tools are essential.

Thus with Goldblatt Tools you can always produce a beautiful finish to meet the individual requirements of the home owner as well as the artistic conception of the architect.

1/4-inch Heavy Duty Electric Drill

A very powerfully motored Drill capable of drilling 1/4-inch holes in steel continuously without overheating or other damage. Will also handle overloads for reasonable periods.

Nicely finished aluminum frames, special high-speed, self-oiling armature bearings, wide-faced hardened gears, thorough and efficient ventilation, gear operated self-tightening chuck, are some of the constructional features. Every vital part built to stand up under gruelling work.

Switch is very conveniently located and easily controlled by slight pressure of the thumb. Twelve feet of rubber covered cable with armored plug provided.

Motors are Universal, operating on either Direct Current or Alternating Current of 60 cycles or less. Motors furnished for either 110 or 220 volts.

No load speed about 1800 R. P. M. Net weight, 6 1/4 pounds.

No. 1042—For 110 volts. Each.....\$36.00

No. 2042—For 220 volts. Each..... 40.00

These Drills are manufactured in ten different sizes as follows:

1/8-inch, 3/8-inch (in wood), 1/4-inch Heavy Duty, 3/8-inch Heavy Duty, 1/2-inch Light Duty, 1/2-inch Standard, 1/2-inch Heavy Duty, 3/4-inch Standard, 5/8-inch Heavy Duty and 7/8-inch Standard.

These tools are delivered to your door at these prices

Pneumatic Hammers

The "Barre" Short Stroke Pneumatic Carving Tool (Beaded Grip) Type A

This is the original "Barre" pneumatic tool, identical in form and structure with the first one made. It has been in use unchanged for twenty years and is still unexcelled for its effectiveness on the finest type of work. Smooth and steady in cutting qualities, and toning down to a nicety in its operation, it covers a range from the most delicate tracing to the heaviest roughing-out. By the test of actual working conditions, it has come to be justly regarded among its users as the tool of perfect action. It offers maximum speed with perfect control; and equal pressure and perfect balance at all speeds. The "Barre" short stroke carving tool type A is now made only with the beaded grip, which is the form preferred by its users. The finger-grip is made only on the long-stroke carving tool, type B. The cylinder is of solid steel, hardened and lapped. There is no outer casing, and there are no plugs in either cylinder or piston; consequently there is nothing to work loose.

Short Stroke Carving Tool Sizes Type A

Pneumatic Hammers

The "Barre" Long Stroke Pneumatic Carving Tool Type B

To meet the demand for a pneumatic carving tool much stronger than our Type A, we have put on the market a tool with a longer stroke than that of our earlier type, and without the sleeve. This longer stroke tool, like all other "Barre" pneumatic tools, is free from complicated mechanism, and affords solid construction, resulting in continuous service; selected material, with consequent durability; low cost in maintenance; economy of air consumption; sufficient power without excessive vibration; ease of handling by the operator; and an efficiency enabling him to do the maximum amount of perfect work. The original "Barre" pneumatic carving tool now listed as Type B is recommended for those desiring a very smooth-running fine-cutting tool. This newer and longer stroke tool is designed for heavier cutting, and is especially suitable for building work.

Pneumatic Plug Driller

The "Barre" pneumatic plug driller is made expressly for drilling plug holes, lewis holes, core cutting, and hand channeling.

The drill is equipped with an automatic push throttle handle which starts the drill operating on a downward pressure and shuts off the air when pressure is released. A new improved locking device is provided to prevent the cap from working loose. This is an important feature, as it is necessary that the cap be kept screwed down tight to bind the valve box to the top of the cylinder, for any leakage of air at this point will greatly impair the efficiency of the tool.

All parts are interchangeable and all parts are hardened and accurately ground to standard size afterward.

Best results will be obtained when operated at a pressure of 75 to 90 lbs. At 90 lbs. pressure the air consumption is approximately 30 cu. ft. free air per minute, and it will drill a plug hole in Barre Granite 4 inches deep in 30 seconds.

Weight of tool, 25 lbs. Length over all, 18 inches. Outside diameter of cylinder, 2 3-8 inches. Size of Drill Bit Shank, 11-16 inch x 2 1-2 inches. A Rotating Wrench for turning drill bit and a Dust Collar are furnished with each driller.

For Drill Bits and Channeling Tools for use with this machine, see page 168.

Price, each\$45.00

HAND BUSH HAMMER

You will find this Patent Bush Hammer a superior tool and one with which you will be entirely satisfied. The cuts rest on a hardened steel gib, which construction produces an unusually lively working hammer. All cuts are made of the best tool steel obtainable. The workmanship and finish of this tool make it the most serviceable implement of its kind that can be produced.

Sizes and Prices

Size	Opening of Jaws	Cuts per End	Weight	Price Each
No. 1-H	1 in.	4	10½ lbs.	\$10.00

Order by number.

Extra Cuts, all sizes	per set	\$3.00
Extra Cuts, for other makes	per set	3.00
Extra Bolts, turned	each 20c per doz.	2.00
Extra Bolts, forged	each 10c per doz.	1.00

We carry in stock hammers filled with cuts as listed above. If a different number of cuts is required, we will fill any hammer, sizes 1 to 5, with any number of cuts up to 12 in each end.

When new cuts are needed for refilling our hammers, state the size of the hammer, serial number and number of cuts wanted; it is not necessary to send the pole.

CUTS FOR REFILLING OLD BUSH HAMMERS

When new cuts are needed for refilling other makes of hammers, either send the pole to us or send an outline drawing of one of the old cuts showing location of bolt holes and giving exact opening of jaws.

RECESSED CHINA BATHROOM FIXTURES

Are recessed in the wall.

Come in tile sizes.

Are well made and easily set.

Are made of vitreous china.

Non-porous, will not chip, craze or discolor.

Latest equipment in the modern home.

Can be installed in cement and plastered walls as well as tile walls.

Are not expensive.

Represent the best in quality and design.

Useful, beautifying, an added convenience.

Are extensively used.

Remain in wall during life of building.

Our China Fixtures are the latest development in permanently built-in fixtures for bathrooms, kitchens and laundries, in homes, apartments and hotels.

They are beautiful in design and finish, with simple but graceful lines. All inside corners are rounded to facilitate easy and thorough cleaning with a damp cloth and require no polishing. They are sanitary as the name implies, will not craze or crack and are non-absorbent, being produced in a fine quality vitreous ceramic ware, with integral gloss, opaque glaze.

For convenience of the tile setter, the line is manufactured in all standard tile sizes, 6"x6", 6"x3", 3"x3", 4 1/4"x4 1/4", also the popular plug-in or shank type fixtures and is complete in both the recessed and projecting types.

While we recommend the use of white china fixtures, due to the popular demand we are supplying through our decorating service, an ever increasing quantity of fixtures in a variety of colors to match or harmonize with tiles submitted by customers.

Colors, other than white, are furnished only on special orders; but very beautiful effects may be had by the use of our Gloss Black Fixtures, of which we always carry a full line in stock. The Gloss Black China Fixtures are exactly double the price of the white. The prices shown on following pages apply to the White China Fixtures.

CONCRETES, CEMENTS, MORTARS, PLASTERS AND STUCCO. By Fred T. Hodgson.

548 Pages, 150 Illustrations, 12mo,
Cloth \$1.75

A complete and reliable guide for the preparation and use of plastic building materials of all kinds. This work deals in detail with the selection, proportioning and application of all generally used materials as employed to secure the forms, grades and styles of construction required in modern building operations of this class.

The following are among the subjects receiving extended treatment: Processes and methods of work; tools and equipments; kinds of cements and concretes with their proper uses; moulding, finishing, cornices and special effects; reinforced concrete. Fully indexed.

PRACTICAL BRICKLAYING—SELF-TAUGHT By Fred T. Hodgson.

278 Pages, 300 Illustrations, 12mo,
Cloth \$1.50

A guide to better results for the working bricklayer. This volume is designed for self-instruction of those engaged in the trade, as well as for apprentices; and is planned to allow the application of the methods and principles to everyday practice as the reader's skill is developed by progress through the instructions.

Includes the following: laying foundations, bonding, arching, gauged work, damp courses, coping, bridges, piers, chimneys, flues, fireplaces, corbeling, cornices, paneling, pilasters, plinths, and all forms of plain and ornamental brickwork. Indexed.

STEEL CONSTRUCTION. By Fred T. Hodgson.

150 Pages, 90 Illustrations, Cloth. \$1.00

PRACTICAL STONE MASONRY— SELF-TAUGHT. By Fred T. Hodgson.

306 Pages, 500 Illustrations. 12mo
Cloth \$1.25

THE BUILDERS' AND CONTRAC- TOR'S GUIDE TO CORRECT MEAS- UREMENTS. By Fred T. Hodgson and

W. M. Brown, C. E. 261 Pages, 45 Il-
lustrations, 12mo, Cloth. Price \$1.50

MODERN ESTIMATOR AND CONTRACTORS' GUIDE. For Pricing All Builders' Work. By Fred T. Hodgson.

318 Pages, 76 Tables. Illustrated.
12mo, Cloth.....\$1.50

A book which explains in detail a large number of simple and practical methods for estimating the cost of all classes of contractors' building work. Typical examples of estimating are fully worked out and the most used information is presented in tables suited for ready reference.

Labor, material and general overhead costs are developed for each kind of work, including excavating and drains; foundations and brickwork; carpentry and roofing; masonry, plastering and paperhanging; plumbing, hardware and finishing; painting and glazing. Fully indexed.

BUILDERS' ARCHITECTURAL DRAWING—SELF-TAUGHT. By Fred T. Hodgson, F.A.I.C.

336 Pages, 250 Illustrations and 18 Folding Plates, 12mo, Cloth Binding
Price, each.....\$2.00

This work is especially designed for carpenters and for students of architecture, woodworkers and others who desire to learn drawing at home and who have not the means or opportunity to take a course in school or college.

The work commences with a description of drawing instruments and accessories, with rules for using them, and hints as to their care and management. Rules for laying out simple drawings are given, and the student is taught step by step to draw to scale, first the plans, next the elevations, and finally the details of a cottage, including foundations, walls, doors, windows, stairs and all other items required for finishing a small building.

PRACTICAL BUNGALOWS AND COTTAGES FOR TOWN AND COUNTRY. By Fred T. Hodgson and E. N. Braucher. 12mo, Cloth, 420 Pages, 400 Illustrations. Price, each. \$1.00

This work contains perspective views and floor plans of over two hundred choice bungalows, cottages, houses and flat buildings, selected with great care to combine architectural beauty, convenience and economy of construction, ranging in prices from \$500.00 to \$3,800.00. Every plan shown is made by a licensed architect and has been built from. This work will be found invaluable to the home builder, furnishing many new and up-to-date ideas and suggestions. We are prepared to furnish blue prints at a very moderate cost ranging from \$5.00 to \$15.00, according to cost of erection, consisting of floor, roof and foundation plans, front, side and rear elevations, with complete type-written specifications.

CEMENT

FOR FARM AND TOWN

By H. COLIN CAMPBELL

C. E., M. D.

Consulting Concrete and Sanitary Engineer
Chief of Bureau of Publicity Portland
Cement Association

Copyright 1920

380 Pages with 250 Illustrations

A compact and comprehensive manual for the cement contractor and for all users of cement and concrete. A brief history of cement is given, with its general properties, its uses and how it should be handled. Concrete, in its manifold structural relations, is fully covered—its component parts, the qualities they should contain, how they should be combined, mixed, placed, etc.—Tools used—Forms—Concrete Block and Brick—Stucco Surface Finish—Walls—Foundations, Roofs, Floors and Walks—Reinforcing Concrete—The Use of Concrete on Large and Small Structures—Uses of Concrete on the Farm, Fence Posts—Walks—Floors—Troughs and Tanks—Milk Houses—Silos—Cisterns—Machine Shed—Fences—Walls—Septic Tanks—Fruit and Vegetable Cellars—Steps and Porches—Hog Wallows—Manure Pit—Ice House—Smoke House—Poultry House—Hog House, Culverts, etc.

Tables of Dimensions are given in connection with the Drawings, making the instructions easy to comprehend by even the amateur cement and concrete worker.

This Book is worth \$1.00 for every page in it; at this rate it would be worth \$380.00 and the price is only:

Cloth Binding, Price..... \$2.50

CEMENT AND CONCRETE
USERS HAND BOOK

By Myron H. Lewis. Everything of value to the concrete user is contained, including kinds of cement employed in construction, concrete architecture, inspection and testing, waterproofing coloring and painting, rules tables, working and cost data. The book comprises thirty-three chapters. A valuable addition to the library of every cement and concrete user. Cloth 430 pages, 126 illustrations.

Price..... \$3.50

Valuable Book on Concrete Pottery and Garden Furniture

173 Practical Plans for using concrete about the home, farm or shop. A book for amateurs as well as contractors with 138 illustrations.

So easy is concrete to use that every one, even amateurs, may be successful in making all sorts of things with it. While concrete and cement are used largely for making useful articles, they are also used for making playthings, and some of these are described in this book.

The experiences herein described are so clearly explained and so practical, that any one can benefit by them. The articles are written by those who have actually had the experiences. Each author tells how he used concrete and what the results were. The numerous pictures make it easy to follow the directions.

These experiences are discoveries. This is not a compilation arranged to be complete, but rather a collection of discoveries made by those who have found unusual ways to use concrete, or who have found easy ways to handle concrete construction. Every article described is practical, and is likely to be of service to almost any one who works with concrete.

A very important feature of this book is its numerous articles on concrete-making equipment. You are told how to make all kinds of forms, how to make mixers, and other devices necessary in concrete construction.

These discoveries may be classified as follows:

- | | |
|---------------------------------------|---|
| 27 Discoveries for FARMERS | 8 Discoveries for FACTORY USE |
| 28 Discoveries for HOME OWNERS | 4 Discoveries for CONCRETE BUILT IN WATER |
| 34 Discoveries for CEMENT CONTRACTORS | 22 Discoveries on CONCRETE FORMS |
| 19 Discoveries for CONCRETE EQUIPMENT | 3 Discoveries for USE IN SHOPS |
| 5 Discoveries on CARING FOR CONCRETE | 23 Discoveries on MISCELLANEOUS SUBJECTS |

Plastering Plain & Decorative

A Practical Treatise on the Art and Craft, including Full Descriptions of Materials, Processes and Appliances, and an Account of Historical Plastering.

By

WILLIAM MILLAR

Plasterer and Modeller

Edited and Remodelled with New Chapters on Lime Stucco, Gesso, Carton-Pierre, Modelling and Design in Relief, Modern Plasterwork, etc.

By

GEORGE P. BANKART

Architect and Decorative Craftsman,
Author of "The Art of the Plasterer," etc.

FOURTH EDITION, REVISED AND ENLARGED

Containing 350 pages, with 122 photographic plates, including many full-page subjects, and 123 line illustrations in the text, making in all 380 ILLUSTRATIONS, comprising a series of Plates of the finest Historic and Modern work in all countries, Working Drawings of Process and Methods, Measured Drawings, Moldings, etc., forming a complete Practical and Historical epitome of the Art and Craft of Plastering.

WILLIAM MILLAR'S "PLASTERING, PLAIN AND DECORATIVE," has been universally recognized as the standard text-book on the Craft for thirty years, and is, in fact, the only book ever issued in which the craftsman can find a compendium of all the practical information necessary to him. It is obvious, however, that since its publication in 1897 experience and competition have produced many important simplifications of processes and changes of methods in plastering, and a number of new materials, all of which are fully treated and illustrated in the present edition. Besides this, the decided renaissance in Design as applied to plaster work, and the strong revival of interest on the part of architects, decorators, designers and of the public generally, indicate, that with modern methods at its disposal, Plastering is again coming into its own as one of the most important branches of Decorative Art.

MR. GEORGE P. BANKART, whose work as a decorative craftsman is well-known, and who is one of the greatest living authorities on the subject and author of various books and papers, has undertaken the task of bringing Mr. Millar's work entirely up-to-date, extending and enlarging where necessary, and collecting a new and unique series of illustrations which should prove of extreme value to the practical worker. The book falls roughly into two divisions, i.e., that dealing briefly with the history of plasterwork in all countries and the best Modern work, and ending with an important chapter on Modelling and design; and the Practical side, which is dealt with very comprehensively, and includes chapters on TOOLS AND APPLIANCES, MATERIALS, TYPES OF CEILINGS, MOULDINGS, EXTERIOR WORK, MODEL AND RUNNING MOULD MAKING AND CASTING, GELATINE MOULDING, FIBROUS PLASTERING, REVERSE MOULDING, COMPOSITIONS, &c. Besides this, there is an important section on PLASTERERS' MEMORANDA, giving QUANTITIES, WEIGHTS, &c., and an Appendix on some recent developments in American Plastering.

The Oldest and Largest Exclusive Business of Its Kind

Millar's Book on Plastering—Continued

William Millar's life work is the greatest book ever written on a craft by a practical workman engaged in it, and this edition has retained, amplified, and modernized all its essential practical information, while working the book into a more compact and handy form, with a more useful and logical arrangement. The vast bulk of the original work rendered it impracticable for post-war republication, but it has been improved by careful condensation, and the elimination of much unnecessary matter. Many of the practical diagrams have been rearranged and redrawn, and fresh plates added to a good scale of Processes, Constructional Work, &c., supplemented by photographs of detail operations and by specially prepared mouldings. There are in all 123 illustrations from drawings, full page and smaller, and the photographic illustrations, comprising about 250, are almost new to this edition. They form a compendium for reference and study which will enable work to be executed in all the principal styles, while illustrating as well Modern Ceilings, Stages of Modelling, Methods of Design, and such Compositions as Gesso, &c. In fact, such is its thoroughness, that the book in its new form should prove **absolutely indispensable** to Plasterers, or any connected with the Craft, such as Architects, Builders, Decorators and the like, whilst its many fine illustrations should recommend it instantly to all interested in or connected with the Decorative Arts.

Contents

43rd
Anniversary Edition
1885-1928

GOLDBLATT'S Catalog *and* Handy Book

On this my 43rd year of successful Tool making for the plasterers and masonry trades, I take this means to thank my thousands of friends who have used my Tools for so many years. There are some of you who have used my Tools from the very beginning of my career and still using them. There are hundreds and hundreds of plasterers and masons, who I knew as apprentices ~ today they are artisans and they all continue to send their orders to me, regardless in what part of the world they live.

As it was then it is now, the apprentices and all young men embarking into any branch of Masonry always start and end with the use of GOLDBLATT "Trowel Brand" Tools. These young men realize that to make good, to properly learn the trade requires the best tools obtainable.

Sincerely,

Goldblatt Tool Company
